ing government to the American government's note concerning the sinking of the Italian steamer Ancona is expected this week. Frederick C. Penfield, the American ambassador, had not received the reply up to Monday evening, however.

## FRENCH CASH IS POURED OUT FOR NATIONAL LOAN

Enormous Sums Subscribed in Response to Appeal of Government for Funds to Prosecute the War.

Paris, Dec. 28.—Subscriptions to the new government loan exceeding 14,500,000,000 francs are for the greater part in cash, says an official announcement made today.

"France may be proud of this great financial success," continues the statement. "The country has responded fully to the appeal of the ministry of finance. It has understood its duty and its interest."

"This fine result has been obtained without hesitation, without appreciation. The banks have not made advances upon the security. There has been no hypothecation of credit. The subscriptions are actually thousands of millions of francs which have been brought to the treasury direct from the pockets of the people. Besides, France has important holdings of foreign securities of which not the least part has been sold."

"The first sign of the recovery will be to reimburse the bank of France for its 2,400,000,000 franc advances. Thus the government of France can emphasize the soundness of its financial policy. This policy indicates clearly that the French state has firmly resolved to maintain the value of its bank notes."

"The confidence in our credit abroad is great. England, Sweden, Holland, Spain, Argentina and other countries have subscribed important sums to the loan."

**TIMELY HUNT ON OVER-EATING.**  
Christmas, New Year's and other feast days cause many disturbed digestions. The stomach and bowels should not be permitted to become clogged up, for indigestion and constipation are often followed by serious disease, resulting from undigested poisons. Foley's Cathartic Tablets should be in every home, ready for use. No gripping or unpleasant after effect. Follows directions after eating, regulates bowels, sweetens stomach and tones up the liver. Sold everywhere.

## DRIVE AGAINST EGYPT IS NEXT OBJECTIVE OF VON MACKENSEN

Preparations Are Now Under Way for Great Stroke Against Most Vital Spot of Whole British Empire.

## VAST ARMY TO MOVE OVER SINAI PENINSULA

Heavy Guns Are Being Transported for Use Against Ships and Fortifications of Suez Canal, Is Report.

Paris, Dec. 28.—Telegrams from Bucharest declare that Field Marshal von Mackensen is directing preparations for a powerful expedition against Egypt, says a Havas dispatch from Rome.

Advances to the Messageries from the Romanian capital, it is added, are that a number of trains loaded with munitions have been sent to Turkey, including one train of twenty-five heavy guns taken with the party of two British officers and shells for the use of the guns, the shipments being destined for use in the Egyptian campaign.

Reports that Germany is preparing a strike against the Suez canal and against the British force of troops in Egypt, and that the German army is now in the Suez canal, it is said, are in accordance with the reports of the German press, it being said, for instance, that the army is likely to consist of from 500,000 to 600,000 men and that a four-track railroad is being built across the half desert region toward Suez.

## BELGIAN TROOPS MAY ENTER GREEK TERRITORY

Brussels, Dec. 28.—The Belgian press today is full of reports that the Belgian army is preparing to enter Greek territory.

The newspaper Nieuws van Dordrecht, through its minister at Athens, reports that the Belgian army is preparing to enter Greek territory. The report is based on a statement made by the Belgian minister at Athens, who is said to have received information from a Greek source that the Belgian army is preparing to enter Greek territory.

It is added that the operations against the Anglo-French expeditionary force might have been a different matter had the French army been operating at the end of the line, while the Bulgarian army, constituting the main part of the force, was engaged in the Balkan campaign.

It is added that the operations against the Anglo-French expeditionary force might have been a different matter had the French army been operating at the end of the line, while the Bulgarian army, constituting the main part of the force, was engaged in the Balkan campaign.

## 8 PROMINENT MEN INDICTED FOR CONSPIRACY

Inclusion of Frank S. Monnett, Former Attorney General of Ohio and Noted Reformer, Was Not Expected.

NEW YORK, Dec. 28.—Eight men, including a congressman, a former attorney general of Ohio, and a former attorney general of Wisconsin, were indicted today by a federal grand jury on a charge of conspiring to obstruct justice in American military factories as part of a campaign, financed by the German government, to check the exportation of munitions to the entente allies.

The men indicted were Congressman Frank Buchanan, of Illinois; former Congressman H. Robert Fowler, of Illinois; Frank S. Monnett, former attorney general of Ohio; M. R. Martin, Herman Schultze, Franz von Kintelen, David Lamar and Joseph C. Taylor.

All of the men, except von Kintelen and Lamar, are officers or former officers of the National Peace Council. The government charged that this organization was financed by France and Germany, a German agent, in furtherance of a campaign to obstruct justice in American military factories as part of a campaign, financed by the German government, to check the exportation of munitions to the entente allies.

Monnett's indictment surprised. None of the men reside in New York. The majority are either in Chicago or Washington and are expected to appear tomorrow before United States commissioners in those cities to give bonds for their appearance in court here.

The indictment of Monnett was the sensation of the grand jury proceedings. The bill against his seven co-defendants had been predicted for several weeks, but Monnett's name had never been mentioned. According to officials, Monnett, Fowler, Buchanan and Lamar were indicted as the leaders in the alleged conspiracy. Von Kintelen, Taylor, Martin and Schultze were indicted as the actual work of attempting to bribe United States officials.

Schultze and Martin are well known as lobbyists. Both were connected with the Anti-trust league and are said to have been business associates of Lamar. Taylor is a labor leader in New Jersey.

## PEACE COUNCIL LOBBY AT NATIONAL CAPITAL

Washington, Dec. 28.—Investigation by the Federal grand jury of New York of the activities of the National Peace Council is a development of the campaign against violations of neutrality.

Since the formation of the peace council, former Representative Fowler, as general counsel, has been active in Washington. At one time he sought to have the federal reserve bank declare that federal reserve notes should not circulate in commercial paper which had been issued of violations involving the manufacture of munitions to be shipped abroad. Later he presented an argument to the board in connection with the loan by American banks to the entente allies.

The latest development here was the introduction by Representative Buchanan of a resolution for the impeachment of M. R. Martin, attorney at New York, who is assisting consideration by the house judiciary committee.

David Lamar, Henry B. Martin and Herman Schultze have been familiar figures in Washington for many years.

## QUARANTINE DAMAGE BEING INVESTIGATED

Chicago, Dec. 28.—Senator W. B. Keim, of Iowa, is seeking to learn how much the national government should pay to Illinois cattlemen for losses due to combating the hoof and mouth epidemic, opened a hearing in Chicago today.

A. G. Leonard, president of the Union Stockyards, Chicago; William R. Skinner, general manager of the National Live Stock Show, and Mrs. Scott Garland, whose prize herd of Guernseys was sacrificed to check spread of the malady were among the witnesses.

Dr. R. B. Tyson, Illinois state veterinarian, cross-questioned the witnesses and tried to show that great care was taken to prevent spread of the disease.

## BRITISH FORCE BEATS OFF ATTACK OF ARABS

London, Dec. 28.—A dispatch from Cairo says: "It is announced that the Egyptian Christmas day on the western Egyptian front were completely successful. An enemy tribesman force 2,000 strong was driven back, leaving 200 dead on the field. Effective support was given the British force by the gunfire from ships."

The British official statement Monday said that on December 25 the principal Arab force near Marsa Matruh (Matruh) was attacked and dispersed with trifling losses to the British troops.

## PROFESSOR SEES DARK OUTLOOK FOR THE FUTURE

Governments That Do Not Wish to Arm Are Compelled to Do So by Those Who Lust for Conquest.

Washington, Dec. 28.—"The prospect is not a bright one," declared Prof. Edward A. Ross, of the University of Wisconsin, in a discussion of the present world situation during his address here tonight to the American Sociological society.

"The 'restless people' and he find themselves confronting this situation. The treaties between the great powers guaranteeing the security of the little people have become mere scraps of paper, warfare has become a capitalist enterprise and fighting a military occupation. The armament, a military government desires in support of aggression may be secured under the pretext of being necessary for national safety. Present preparations of a peace-loving people for defense may be construed as designed for aggression. The nation that out-arms the others runs no risk and may be provided for its preparedness by success in war. The nation that lags behind the rest in preparation of war runs the risk of being overthrown by conquest."

"It follows that the war-loving nations have power to force the peace-loving nations into the gloomy path of armament or war, whereas the peace-loving nations have no power to force the war-loving nations into the path of peace. The path of Mars is the path for the rest of the world. A cool, relentless analysis of the situation discloses little ground for hopeful anticipation."

"The only way of escape of the advanced nations from the ruinous results of their inevitable competition for place and advantage in the backward parts of the globe, lies in their combining to create an international commission with the means of adjudicating disputes and enforcing awards. Thinking in terms of the nation is destroying the people of Europe of the rate of 10,000 a day. Is it not high time we were thinking in terms of some international league of peace, world federation or other unit capable of keeping the peace without surrendering the status quo or hindering the survival of the fittest and the success of the adapted nation?"

## PNEUMATIC TIRES MADE WITHOUT RUBBER

Vienna, Dec. 28.—(via London, 8:52 p. m.)—The announcement that a German professor has succeeded in making synthetic rubber from chemicals has brought to light here the fact that an Austrian engineer named von Dinkowski (two months ago applied for a patent on a tire consisting of wood fibre and certain binders).

The specifications show that the tire follows the old pneumatic principle in every detail, there being an inner tube and an outer tire. The main material used is willow and birch fibre. What the binder consists of has not been revealed but no rubber whatever is used.

It was announced a motor car fitted with the new tires ran 247 miles under adverse conditions and the tires showed no signs of undue wear. It is said that the invention is such a success that a large Vienna bank is financing it.

**Cutter Hastens to Aid Ship.**  
New York, Dec. 28.—A report has been received from Sandy Hook that the coast guard cutter Seneca had gone to the assistance of the Greek steamship Thessaloniki, which is reported in distress.

## TO PREVENT THE GRIP.

Colds, coughs, Grip, Influenza, Quinine removes the cause. There is only one "Grip Quinine." E. W. GLOVER'S signature on box. 25c.

## FOR RENT

**\$10.00.** A three-room semi-modern house on Pacific avenue near Fourth street, perfect repair; good location.  
**\$15.00.** New 5-room brick with bath. On North Fifth street. Desirable location.  
**\$50.00.** Storeroom between South Second and First streets. Brick, 25 by 100 feet.

## WE HAVE

Vacant lots for sale in all parts of the city for cash or on installment plan. Also ranches, large and small, in different parts of the valley.

## WHY

Reasons why you should buy real estate in and around Albuquerque NOW are numerous. We have passed through a long period of depression. Real estate prices will never be lower. There are the best of reasons for steady increases in values from now on.

The close of the war in Old Mexico will greatly improve business conditions generally. Lumber companies (continued below)

## PROHIBITION IN COLORADO TO BE MADE EFFECTIVE

Officials Meet and Determine Upon What Restrictions Are Imposed Upon Use of Intoxicants.

Denver, Colo., Dec. 28.—District attorneys, game wardens, inspectors and other officials more than a hundred in number, met today to agree upon construction of certain features of the prohibition amendment, effective January 1, 1916.

Liquor purchased before January 1 for family consumption, may be given to guests within the home thereafter, it was agreed. A room in a hotel, under the construction of a new hotel, is not a home. No newspaper published within the state may carry liquor advertisements. Magazines published outside the state and delivered within its borders may carry liquor advertisements, but may not be sold from news stands, while containing such advertisements.

Landlords and owners of buildings who fail to remove liquor signs by January 1 may be prosecuted. To carry intoxicating liquor into the state in an automobile for illegal purposes makes the automobile a common carrier, and makes the owner liable to prosecution.

Brandy sauce may be imported for cooking purposes, but may not be manufactured within the state. The constructions thus placed upon the law are to be uniformly adopted, subject, of course, to any ruling by the courts.

The meeting will be continued tomorrow to consider the remaining portion of the measure which is being taken up section by section.

## LA FOLLETTE'S SEAMEN'S LAW HIGHLY PRAISED

Washington, Dec. 28.—Members of the American Association for Labor Legislation, in annual convention here today, devoted a session to praise and defense of the new seamen's law, which became operative November 1, this year, and which some ship owners have declared will drive all American ships off the seas.

"Better an American marine than a merchant marine with no American mariners," was a phrase in an address of Henry W. Farnum, professor of political economy at Yale, Andrew Furuseth, president of the International Seamen's union, which worked for the passage of the measure, declared it would not injure ship owners seriously, though he said it had not been in operation long enough to determine what would be the ultimate effect.

Space on a program allotted to representatives of steamship associations was left vacant and delegates emphasized the fact that while the ship owners objected to the law, none would accept an invitation to oppose it before their society.

Social insurance and the economic need of health insurance were discussed at the morning session.

Professor Irving Fisher was elected president of the association. Secretary Wilson of the department of labor appeared before the convention unexpectedly late in the day and joined earnestly in defense of the seamen's law. He emphasized its humanitarian features and declared it had achieved for the American seaman his first step toward real freedom.

**To Prevent the Grip.**

## DRINK WATER TO AVOID SICKNESS SAYS AUTHORITY

Glass of hot water before breakfast daily keeps the doctor away.

Sanitary science has of late made rapid strides with results that are of untold blessing to humanity. The latest application of its nurturing research is the recommendation that it is as necessary to attend to internal sanitation of the drainage system of the human body as it is to the outside of the home.

Those of us who are accustomed to feel dull and heavy when we arise, splitting headache, stuffy nose, cold, sore throat, indigestion, constipation, etc., are, instead, fed as fresh as a daisy by drinking the glasses of the system each morning and flushing out the whole of the internal poisoning, stagnant matter.

Everyone, whether ailing, sick or well, should, each morning, before breakfast, drink a glass of real hot water with a teaspoonful of phosphate in it to wash from the stomach, liver and bowels the previous day's indigestible waste, sour bile and poisons, toxins, etc., cleansing, sweetening and purifying the entire alimentary canal before putting more food into the stomach. The action of hot water and limestone phosphate on an empty stomach is wonderfully purgative. It cleans out all the fermentations, gases, waste and acidity and gives one a splendid appetite for breakfast. While you are enjoying your breakfast the phosphate has been at work extracting a large volume of water from the blood and setting ready for a thorough flushing of all the inside organs.

The millions of people who are bothered with constipation, biliousness, stomach troubles, rheumatic stiffness, etc., who have swollen limbs, blood disorders and sickly complexion are urged to get a quart of phosphate from the drug store. This will cost very little, but is sufficient to make any one a pronounced crank on the subject of internal sanitation.
